Part 3 (5 points, coding task)

Do the following tasks in this part.

1. In `df_2`, remove all rows that contain null (missing) values.
2. Save the updated DataFrame object as `df_3` (that is, the change of `df_2` should not be `inplace`).
3. For `df_3`, print the count of missing values per column.
4. Print the shape of `df_3`.

Mar 2025

```
### WRITE YOUR SOLUTION HERE ###
df_3 = df_2.dropna()

print(df_3.isnull().sum())

print(df_3.shape)
""" END OF THIS PART """
```
