2025 USA-NA-AIO Round 2, Problem 3, Part 12

USAAIO 🛡   **May 2025**

Part 12 (5 points, non-coding task)

Explain why we use $\log \tau$ as an attribute, not τ.

USAAIO 🛡   **May 2025**

Misplaced '#'

$\log \tau$ can take all real values. So we do not have to worry about its range.

However, τ must be positive. Hence, if we use τ, we always need to take care of its domain.
